Introduction: Google Classroom is a free web service developed by Google for schools that aims to simplify creating, distributing, and grading assignments. The primary purpose of Google Classroom is to streamline the process of sharing files between teachers and students. It is estimated between 40 to 100 million users use Google Classroom.

Google Classroom integrates docs, sheets, slides, gmail, and calendar into a cohesive platform to manage student and teacher communication. Students can be invited to join a class through a private code, or automatically imported from a school domain. Teachers can create, distribute and mark assignments all within the Google ecosystem. Each class creates a separate folder in the respective user's Drive, where the student can submit work to be graded by a teacher. Assignments and due dates are added to Google calendar, each assignment can belong to a category (or topic). Teachers can monitor the progress for each student by reviewing revision history of a document, and after being graded, teachers can return work along with comments.

Content of Google class room: You can use Classroom in your college to streamline assignments, boost collaboration, and foster communication. Classroom is available on the web or by mobile app. You can use Classroom with many tools that you already use, such as Gmail, Google Docs, and Google Calendar.
